Gallagher Next

The next generation of innovation.

For 85+ years, Gallagher has led with innovative solutions, reshaping agritech and unlocking tomorrow's possibilities.

RESHAPING THE AGRITECH INDUSTRY

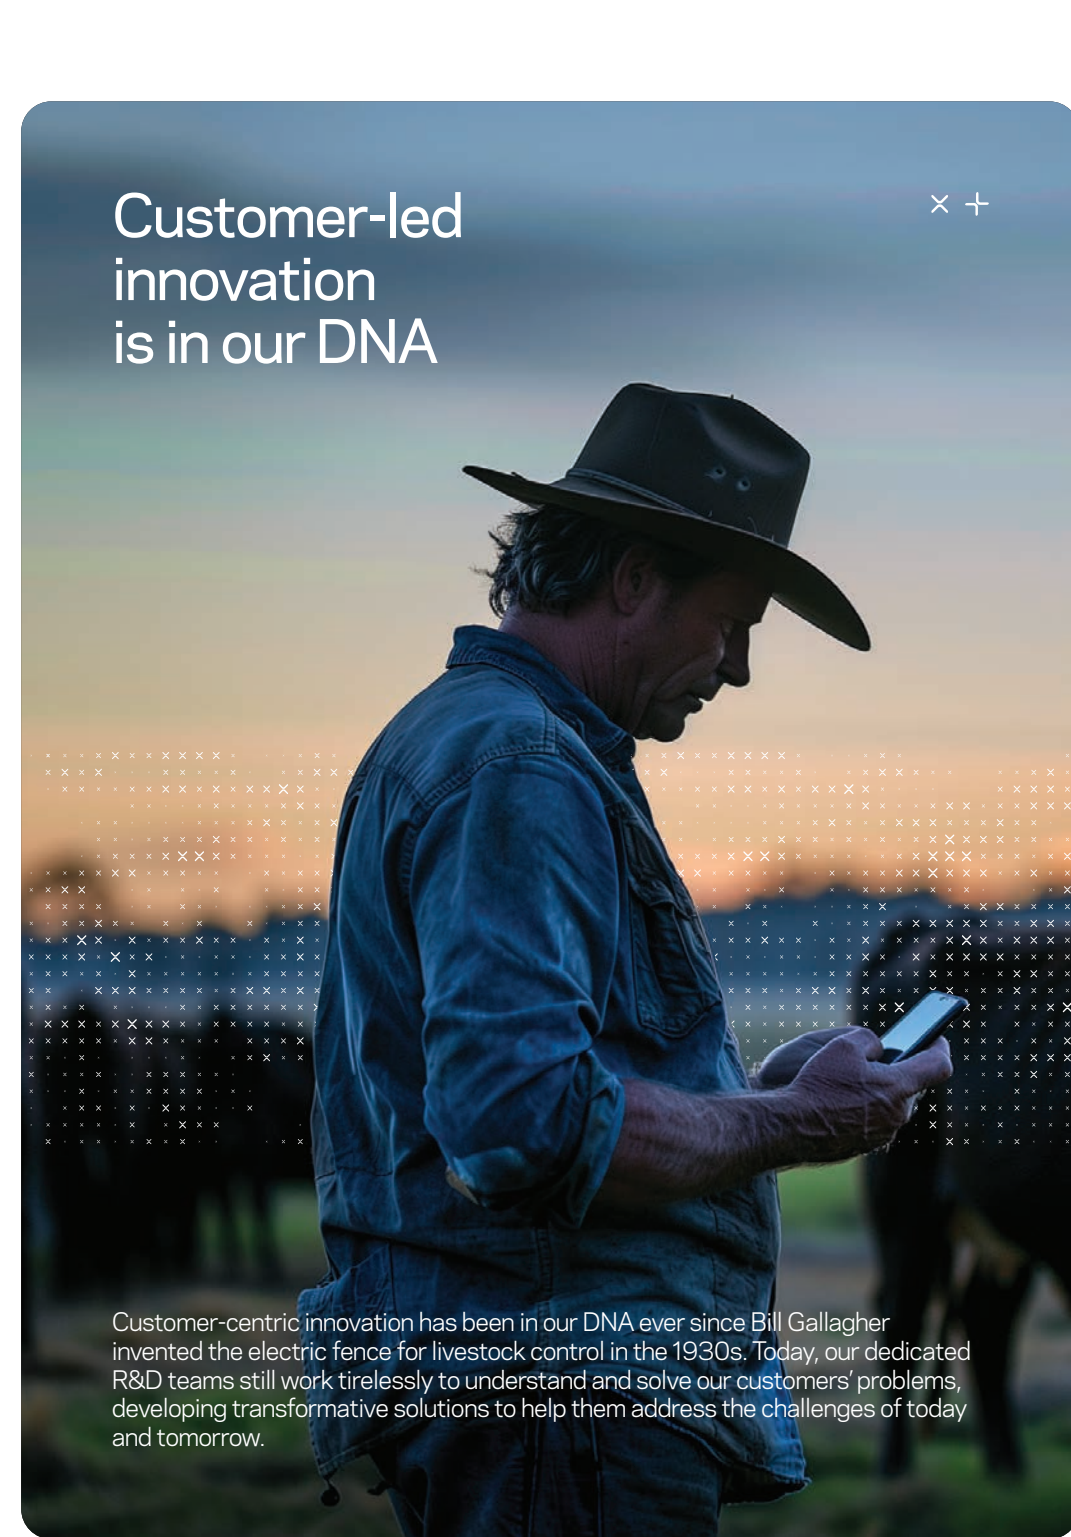

Combining all we know, customer insights, and a little creativity, Gallagher Next takes innovation to a new level to unlock the next generation of outside-the-box solutions.

Where purpose meets innovation, Gallagher Next is our commitment to drive meaningful change for customers and communities. Whether it's safeguarding the future of a family business, or conserving a natural habitat, Gallagher Next solutions are developed to meet our customers needs.

Embark on a journey of future-focused, transformative innovation with our pioneering technologies. Gallagher Next is reshaping the agritech industry and unlocking new possibilities for tomorrow's world.

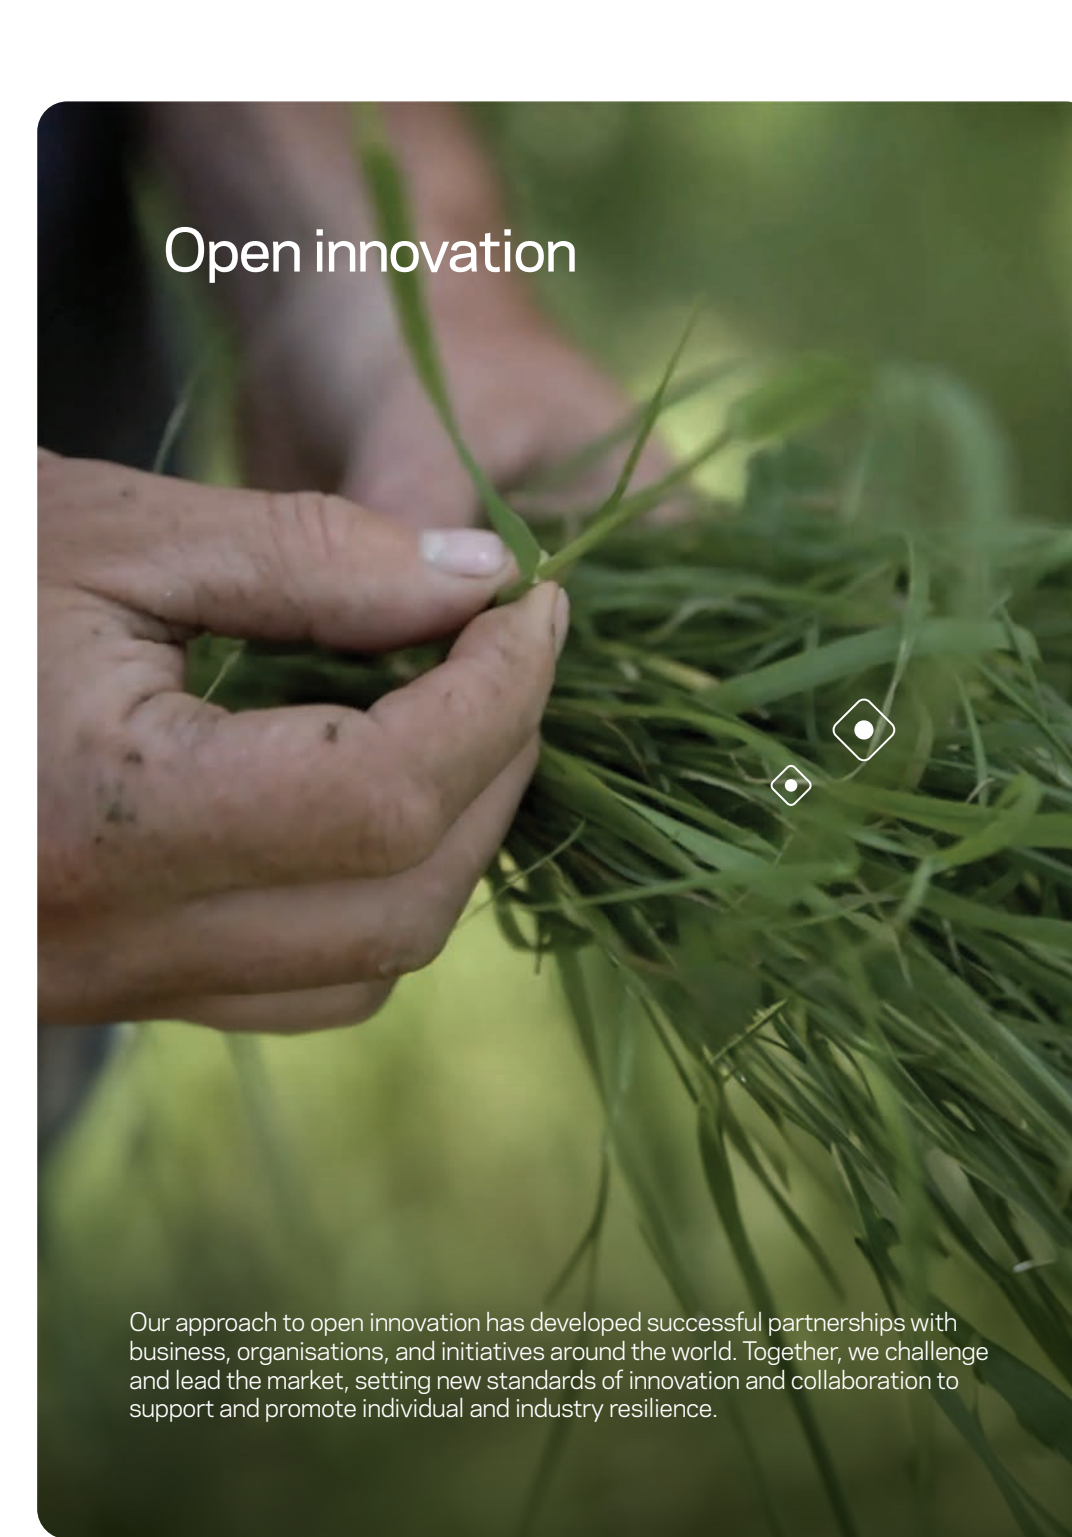

Customer-led innovation is in our DNA

Customer-centric innovation has been in our DNA ever since Bill Gallagher invented the electric fence for livestock control in the 1930s. Today, our dedicated R&D teams still work tirelessly to understand and solve our customers' problems, developing transformative solutions to help them address the challenges of today and tomorrow.

Open innovation

Our approach to open innovation has developed successful partnerships with business, organisations, and initiatives around the world. Together, we challenge and lead the market, setting new standards of innovation and collaboration to support and promote individual and industry resilience.

Virtual fencing is ready, are you?

What is eShepherd™?

eShepherd is a solar powered, GPS enabled, livestock neckband that enables you to track, fence and move your livestock around your farm using virtual boundaries or fences.

Simply draw your virtual fence anywhere on your property and your cattle are trained to remain within the virtual barrier.

Pushing boundaries in livestock farming.

Precision farming, for a better bottom line

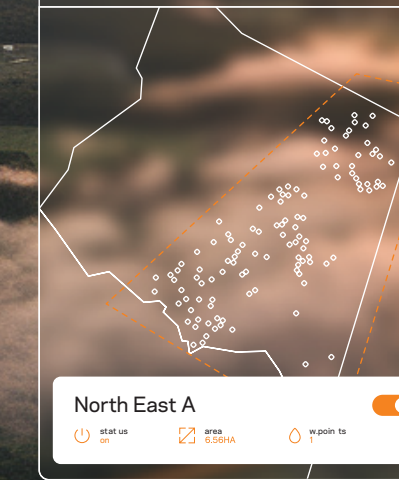

Gather real time insights for individual animals to grow your livestock faster with less inputs.

eShepherd represents a step-change in farming. Integrating on-animal technology and data-driven decision tools to optimise productivity, performance, and the sustainability of your land.

Virtual Paddock

Cleaner, future proofed farming

Promote the health of your land. Improve the sustainability and profitability of your business by protecting waterways and wildlife habitats while improving pastures and optimising your production. eShepherd is a solution for livestock exclusion without the same reliance on skilled labour and ongoing fence maintenance. Environmental protection is simplified encouraging healthy and resilient land management.

The next generation of innovation.
