

## Package contents

- WiFi Gateway
- 1 x RJ12 cable
- 5V Power Supply
- Instructions

The Gallagher WiFi Gateway is compatible with all i Series Energizers and provides the ability to manage your i Series Energizer via the Gallagher Dashboard Fence app.

## WiFi Gateway Installation

Before installing your WiFi Gateway you need to ensure you are able to provide WiFi network coverage at the install location of your i Series Energizer. If you are in a remote location consider a WiFi Mobile hotspot as a connectivity solution.

### To install your WiFi Gateway:

1. Turn off your Energizer.
2. Connect the RJ12 cable between the Wifi Gateway and the Energizer.

If you want to use the Energizer controller, this can also be connected directly to the Wifi Gateway.

3. Connect the supplied 5V power supply to the 110V/230V supply.

### Note:

If powering from a 12V battery please contact a Gallagher representative for assistance.

## Create an account

To use the Gallagher Dashboard Fence app you need to create an account. This can be done from your PC by going to:

<https://ap.appsonfarm.com/signup/begin?brand=gallagher>

- Signup and create a login.
- Select the Fence Monitoring plan and follow the on screen instructions to complete registration.
- Use the login to connect to the Gallagher Dashboard Fence app.

## Download the App

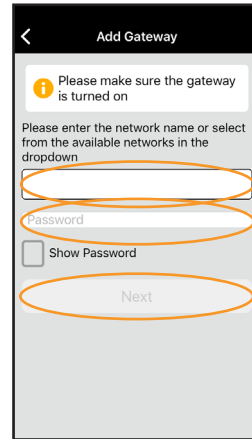

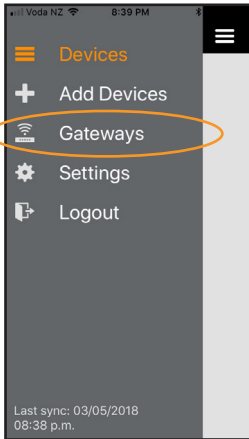

The Gallagher Dashboard Fence app is downloadable from the Apple App and Google Play stores.

Control and view the performance of your i Series Energizer. Set alarms and receive notifications direct to your smartphone.

## Configuring your WiFi Gateway

1. Open the Gallagher Dashboard Fence app.
2. Select **Gateways** in the menu. →
3. Select **Add Gateway**. →
4. Enter the Wifi network details of the network you want to connect to and press **Next**.

**Tip:**  
Connecting your phone to the same network will automatically load the network name into the app.

5. Power the Wifi Gateway and ensure the status LED is blinking orange.
6. Read and follow the instructions on the Smartphone app. →
7. When complete your Wifi Gateway will appear.
8. Select **Add Devices** in the menu and the app will discover connected Energizers for you to manage.

**Note:**  
Multiple Energizers can be managed, however each requires a separate Wifi Gateway and subscription.

## Troubleshooting

If the configuration is not successful:

1. Select **Clear** in the top right corner.
2. Reset the power to the Wifi Gateway - ensuring the Status LED is blinking.
3. Read and follow the instructions on the Smartphone app. →
4. Gateway Status LED will now be blinking orange. →
5. Repeat steps 3 to 7 above to configure the Gateway.
