

On The Wire

March 2017

Greetings,

Welcome to the first edition of "On The Wire" for 2017.

On The Wire is an initiative to showcase new innovation, articles and general happenings within the rural landscape. With this in mind, together with your help, we are looking to introduce a new section - "On farm with Gallagher".

If you have a Gallagher related story or a great picture you want to share, email it through to cs@am.gallagher.com. If your story or picture is published in the next edition of On The Wire, you will receive a selection of our new product innovations.

Christmas break seems like a long time ago as all hands are on deck to embark on an extremely busy next few months. The Product Management teams have been tirelessly working to deliver a series of new innovative solutions.

We have extended our Portable Solar Energizer range to now include the S40 and S100. These are powerful portable solar units for more demanding situations.

Permanent Wire Strainers feature in some way or another on almost every farm in NZ. Be sure to check out what our R & D team has achieved with a very innovative solution to an Insulated End Strainer. This product is truly unique and will offer a sound solution to strainers that struggle in a corrosive environment.

We have also developed the Insulated Line Post - a new semi-permanent post option. Requiring no machinery to install, this fantastic post is perfect for difficult to fence areas, such as near waterways. We have created four different size options to cater for the wide variety of farm types in New Zealand.

These new products will be the highlight of the three Regional Field Days in Dargaville, Feilding and Kirwee throughout March so be sure to drop in to explore how these leading-edge products can assist you on farm.

Darrell Jones
National Sales Manager

S40 and S100 Pack a Solar Punch

Farmers requiring more kick from their portable fencing unit have their needs met with the new Gallagher S40 and S100 Portable Solar Energizers.

Electric Fencing in Dry Conditions

In light of recent dry conditions in areas around New Zealand such as Northland, Canterbury and Hawkes Bay, we thought it appropriate to shed some light on some of the things to be aware of when it comes to maintaining your electric fence during dry conditions.
